## Cycle Turn Indicator Direction and Swing Summary of Select Markets as of the close on April 19, 2024

Market	Daily CTI	Daily Swing	Weekly CTI	Weekly Swing
Industrial	Neutral	Low	Negative	High
Transports	Negative	High	Negative	High
NDX	Negative	High	Negative	High
S&P Inverse Fund	Positive	N/A	Positive	Low
CRB Index	Positive	Low	Positive	Low
Gold	Negative	Low	Positive	Low
XAU	Negative	Low	Positive	High
Dollar	Negative	Low	Positive	Low
Bonds	Positive	Low	Negative	High
Crude Oil	Positive	Low	Negative	High
Unleaded	Negative	High	Negative	High
Natural Gas	Positive	Low	Positive	High

\*Since this fund is quoted at the end of the day it is impossible for the concept of swing highs and lows to apply on a daily level. The primary interests here are the weekly developments.

The daily is representative of the short-term and the weekly is representative of the intermediate-term

# Short-term Updates

---

## **Note on the Cycle Turn Indicator**

The most important indicator we have is the Cycle Turn Indicator and the most important timeframe, at least in my mind, is the intermediate-term. This indicator has proven itself time and time again. In reality, this is all we really need to know. Everything else is secondary. That being said, please be sure to monitor the "Cycle Turn Indicator Direction and Swing Summary" above. Red indicates that a swing high and down turn of the Cycle Turn Indicator has occurred and lower prices should follow. The only exception here is that on the daily stock market signals we also want to see both the slow cycle Turn Indicator and the New High/New Low Differential in agreement with the original Cycle Turn Indicator, which is what is covered in this summary above. Yellow, is cautionary meaning that the Cycle Turn Indicator and the swing are not in agreement, which is typically indicative of a trend change. Green, means that a swing low has occurred and that the Cycle Turn Indicator is positive, which should be followed by higher prices. Again, the only exception here is the daily stock market signals in that we want to see both the slow Cycle Turn Indicator and the New High/New Low Differential in agreement with the original Cycle Turn Indicator, which is what is covered in this summary above. For everything else, all that matters is the formation of a swing and the direction of the Cycle Turn Indicator.

See Notes for New Subscribers at the bottom of the Short-Term Update Page or the Research Letter page for information on understanding Cycles and Swings.
